

Why Veterinary Practices are Moving to the Cloud

Modern veterinary practices deserve modern solutions.

Running a veterinary practice today means balancing patient care, staff well-being, and the growing administrative load that comes with it. For many clinics, legacy or on-premise systems create more friction than support, with outdated software, manual updates, and limited accessibility all slowing operations when speed and precision matter most.

Veterinary professionals spend **25–35% of their time** on manual admin tasks that could be automated with modern systems.
— AAHA Technology Benchmark Study, 2023

Why the Industry is Moving to the Cloud

Veterinary practices are standing at a crossroads: **modernize or be held back by the past.**

With many legacy platforms nearing end-of-life, now is the time to make the change. A move to the cloud means stronger security, more efficient workflows, and seamless access to data from anywhere, keeping your practice connected, protected, and prepared for what's next.

Over **60% of veterinary practices** plan to migrate fully to cloud-based systems by 2026.
— VetSuccess Technology Adoption Report, 2024

Cloud Systems Built for Modern Practices

Simplified Workflows

Cloud platforms automate scheduling, invoicing, and reporting so your team can focus more on patients and less on paperwork.

Reliable Data Security

With multi-layer encryption, automatic backups, and recovery, your data stays protected — no IT intervention required.

Real-Time Collaboration

Doctors, technicians, and client service teams all work from the same platform, ensuring consistent, efficient care.

Scalable Growth

Add users, integrations, or even new locations without costly hardware or downtime to upgrade.

Common Concerns, Real Solutions

Hesitation

"We're too busy to make the switch."

The Reality

Most practices migrate with full support to minimize disruption.

"I'm close to retirement."

Up-to-date technology **increases practice valuation** and simplifies transition planning.

"Our team isn't tech-savvy."

Modern cloud software is intuitive and comes with **hands-on training**; your provider will handle updates and maintenance.

Why Clinics Trust DaySmart Vet

DaySmart Vet was designed alongside veterinary professionals to simplify operations, safeguard data, and support your team's daily workflow.

What you'll gain:

- Secure, always-available data access
- Streamlined appointment and billing tools
- Expert onboarding and migration with 24/7 support
- A trusted technology partner — not just software

See the Difference
